COMP 6704: Advanced Topics in Optimization

Group Project

PolyU Fall 2026

1 Group Project Topic and Presentation Schedule

Week	Date	Topic	Group id
7	13-Oct	Linear Programming	20, 5, 6, 14
8	20-Oct	Linear Programming	24, 25, 17, 2
9	27-Oct	Convex Optimization	16, 4, 15
10	3-Nov	Convex Optimization	8, 9, 3, 10
11	10-Nov	Unconstrained Optimization	13, 1, 11, 21
12	17-Nov	Unconstrained Optimization	22, 7, 18, 12
13	24-Nov	Constrained Optimization	23, 19

2 Group Member Assignment

	Group member 1		Group member 2		Group member 3		Group member 4	
Group id	student name	student ID	student name	student ID	student name	student ID	student name	student ID
1	DING Yaohong	26120954x	MA Jiawei	26035043r	WANG Shuaixiong	26027825r	YAO Weipeng	26027694r
2	DENG Bowen	26007452r	GUO Kehan	26036712r	LIU Mingxuan	23036683r	ZHANG Yuchen	26032561r

3 Q&A Session

To encourage active class engagement, the four groups whose IDs immediately follow the presenting group should prepare at least one relevant question in advance. This will contribute to your attendance mark. For example, when

Group 10 presents, Groups 11–14 should be ready to ask questions during the Q&A session.

4 Consultation

If you have concerns regarding topic selection, you are welcome to submit a short summary of your intended project topic to the instructor for feedback. Meanwhile, if you have any other questions about the project requirements, you may discuss them with the TA, Mr. Yuhui Wu (yuhui.wu@connect.polyu.hk). To avoid your email being overlooked, it is strongly recommended that you begin your email subject line with "COMP6704+Group Project+Group id" (for example, "COMP6704+Group Project+Group5"). If you do not receive a reply within 48 hours, please forward your query to the course instructor.
